

# ENCOR® 357

Vinyl Acrylic Latex with Improved Block Resistance for Interior Finishes

<b>Product Benefits</b>	ENCOR® 357 latex is a general-purpose binder that offers broad formulating latitude and improved block resistance compared to standard vinyl-based latexes. This vinyl acrylic polymer offers a cost-effective balance of properties, including good scrub resistance, excellent gloss capability, good thickener response and good touch-up performance.														
	ENCOR® 357 latex is suitable for use in interior finishes from flat to semigloss. Incorporation of non-VOC coalescing solvents allows the formulator to meet a variety of (0-250 g/L) VOC targets. ENCOR® 357 latex is EnVia® certified.*														
<b>Polymer Design</b>	<ul style="list-style-type: none"> <li>• Vinyl acrylic</li> <li>• No added alkylphenol ethoxylate (APEO) surfactants</li> <li>• No added formaldehyde or formaldehyde donors<sup>1</sup></li> </ul>														
<b>Performance Benefits</b>	<ul style="list-style-type: none"> <li>• Exceptional gloss development</li> <li>• Excellent block resistance</li> <li>• Good scrub resistance across the PVC range</li> <li>• Good touch-up performance</li> </ul>

## Product Safety

Before handling the materials listed in this bulletin, read and understand the product MSDS (Material Safety Data Sheet) for additional information on personal protective equipment and for safety, health and environmental information. For environmental, safety and toxicological information, contact our Customer Service Department at 1-866-837-5532 to find an MSDS, or visit our web site: [www.arkemacoatingresins.com](http://www.arkemacoatingresins.com)

No chemical should be used as or in a food, drug, medical device, or cosmetic, or in a product or process in which it may contact a food, drug, medical device, or cosmetic until the user has determined the suitability and legality of the use. Since government regulations and use conditions are subject to change, it is the user's responsibility to determine that this information is appropriate and suitable under current, applicable laws and regulations.

Arkema Coating Resins requests that the customer read, understand, and comply with the information contained in this publication and the current MSDS(s). The customer should furnish the information in this publication to its employees, contractors, and customers, or any other users of the product(s), and request that they do the same.

## Storage and Handling

Follow procedures typically recommended for polymer dispersions. Use corrosion-resistant storage tanks and piping. Air-operated diaphragm pumps are preferred. Avoid temperature extremes. Do not freeze; store between 4-40°C.
