ENCOR® 5100

CONSTRUCTION ARKEMA COATING RESINS

Product Application details	${\sf ENCOR}^{\circledast}$ 5100 is a high solids, cement-compatible styrene-acrylic latex. The from coalescing agents, plasticizers and APE surfactants.	nis product is free	
	ENCOR® 5100 is ideally suited for the modification of Portland cement and other hydraulic binder systems. It finds application in the formulation of two-component membranes, sealing and bonding slurries as well as water resistant ceramic tile adhesives.		
	ENCOR® 5100 may also be used in the formulation of sealants, liquid romembranes and for the modification of anionic bitumen emulsions.	oofing elastomeric	
Performance Benefits	 Elasto-plastic and permanently flexible film (till -5°C) High adhesion to mineral substrates Excellent water, chemical and alkali resistance 		
Polymer Type	Styrene-acrylic Copolymer		
Sales Specifications	Solid Content at 105°C, % (ISO 3251)	59 - 61	
	pH (ISO 976)	6.5 - 8.5	
	Viscosity at 23°C, mPa.s (Brookfield RVT , 20rpm) (ISO 2555)	500 - 1500	
Other Characteristics ¹	Stabilizing system	A / NI	
	Minimum Film Formation Temperature, °C (ISO 2115)	<1	
	Tg (DSC), °C	- 8	
	Density / Specific Gravity at 23°C, g/ml (ISO 2811)	1.03	
	Average Particle size, nm (ISO 13321)	300	
	1 The data provided for these properties are typical values, intended only as guides, and should not be construed as sales specifications		
Formulation Guidelines	The use of defoamers is recommended to avoid air entraining during the mortar mixing phase. The use of thickeners has to be carefully checked in advance as some of them can cause stiffening phenomena and can interfere in the setting process. Air cure conditions have to be applied for optimum strength properties of cement-based systems.		

Product	Please refer to the corresponding Safety Data Sheet.		
Safety	The state of the second sequences, a second		
Storage & Handling	ENCOR® 5100 should be stored indoors in the original, unopened and undamaged container, in a dry place at storage temperatures between 5°C and 30°C. Exposure to direct sunlight should be avoided. The product is protected to prevent any microbial deterioration during normal conditions of storage but care should be taken to avoid accidental contamination during subsequent handling and processing.		
	In the above mentioned storage conditions the shelf life of the resin will be 6 months from the shipping date

Arkema has implemented a Medical Policy regarding the use of Arkema products in medical devices applications that are in contact with the body or circulating bodily fluids (http://www.arkema.com/en/social-responsibility/responsible-product-management/medical-device-policy/index.html) Arkema has designated medical grades to be used for such medical device applications. Products that have not been designated as medical grades are not authorized by Arkema for use in medical device applications that are in contact with the body or circulating bodily fluids. In addition, Arkema strictly prohibits the use of any Arkema products in medical device applications that are implanted in the body or in contact with bodily fluids or tissues for greater than 30 days. The Arkema trademarks and the Arkema name shall not be used in conjunction with customers' medical devices, including without limitation, permanent or temporary implantable devices, and customers shall not represent to anyone else, that Arkema allows, endorses or permits the use of Arkema products in such medical devices

It is the sole responsibility of the manufacturer of the medical device to determine the suitability (including biocompatibility) of all raw materials, products and components, including any medical grade requirements and to adequately advise and warn purchasers, users, and/or learned intermediaries (such as physicians) of pertinent risks and fulfill any postmarket surveillance obligations. Any decision physician.
